***Response to Amendment***

The examiner is in receipt of applicant's response to the office action mailed 6/6/2005, which was received 9/6/2005. Acknowledgement is made to the cancellation of claims 1-16, 18-21, 24-27 and the amendment to claims 17, 22, 23, 28 and 29, leaving claims 17, 22, 23, 28 and 29 as pending in the instant application. The applicant's remarks and amendments have been carefully considered, and were found to be persuasive in overcoming the USC 101 rejection, however the rejection on the merits stands and is restated below, modified as necessitated by amendment.

**Examiner's Note**

Examiner has cited particular columns and line numbers or figures in the references as applied to the claims below for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant, in preparing the responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

**Claims 17,22,23,28 and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dodd (US 6,633,849) in view of McGill (20020016734).**

**In regards to claims 17,22,23,28 and 29**, Dodd teaches the instant invention including accepting a gift and permitting a recipient to change the gift prior to delivery (col 3, lines 40-55), but does not specifically mention maintaining profiles of the users and presenting information about a recipient's likes and dislikes. McGill teaches maintaining a database of a gift recipient's past purchases along with likes and dislikes (page 4, para 54-58). It would have been obvious to a person having ordinary skill in the art at the time of the invention to include in Dodd the teachings of McGill, because this data structure enables users to search for information that shows specific needs thus producing a highly efficient system for delivering highly targeted information to the gift giver (page 3, para 27).

***Response to Arguments***

Applicant's arguments with respect to claim 17,22,23,28 and 29 have been considered but are moot in view of the new ground(s) of rejection necessitated by amendment.
